Simple Solutions for
Venous Disease, Lymphedema & Wound Care

Compreflex Standard

CALF & FOOT

20–50mmHg

Garment Features

- 20–50mmHg of adjustable resting compression accurately measured using our patented Accutab® Device
- Stretch panel secures garment for easy donning
- Conforming Breathe-O-Prene® provides a comfortable fit
- Patients outside of the standard product size range can use the Compreflex Strap Extender for an additional 10cm in circumferential length
- Billable under Medicare Code **A6545-AW** for patients with active venous stasis ulcers

Indications

- Lymphedema
- Edema
- Chronic venous disease (CVD)
- Chronic venous insufficiency (CVI) including, but not limited to: ulcer due to venous stasis
- Lipedema

When to Use

- Patient requires a calf and foot garment
- Varying ranges of adjustable resting compression is desired (20–50mmHg)
- Non-attached foot piece is desired
- No compression in the liner is desired

Ideal for Patients Experiencing

- | | |
|-------------------------------|---|
| • Active Venous Stasis Ulcers | • Fibrotic Tissue |
| • Obesity | • Irregular Shaped Limb |
| • Poor Skin Condition | • Poor Grip Strength |
| | • Unable to don traditional Compression Stockings |

Accutab® Devices

Wrap Details

Variable Compression

Each Compreflex Calf wrap includes the Accutab, allowing users to accurately adjust the garment to the desired level of compression

Intelligent Design

Garment features a contoured calf, providing a superior fit

Premium Materials

Soft, conforming Breathe-O-Prene provides a comfortable fit

Easy Application

With a front stretch panel to secure the garment in place and straps that roll back, the garment is easy to don and adjust, improving adherence

Superior Quality

Each garment is double stitched to ensure durability and is backed by a six-month warranty*

Comprefit Standard

CALF & FOOT

30-40mmHg

Garment Features

- 30-40mmHg firm, non-stretch compression
- Rigid, non-stretch garment profile providing a high level of containment
- Two slot options provide a comfortable fit
- Garment can be adjusted to include an additional 10cm of circumferential range by adding the Comprefit Standard Strap Extenders

Indications

- Lymphedema
- Edema
- Chronic venous disease (CVD)
- Chronic venous insufficiency (CVI) including, but not limited to: ulcer due to venous stasis
- Lipedema

When to Use

- Patient requires a garment with no stretch
- Patient requires compression in foot; product includes Compreboot
- A high level of containment is needed
- No compression in the liner is desired

Ideal for Patients Experiencing

- Active Venous Stasis Ulcers
- Obesity
- Poor Skin Condition
- Irregular Shaped Limb
- Unable to don traditional Compression Stockings

Wrap Details

Variable Compression

Comprefit is ideal for patients with chronic venous disease or those needing compression therapy following a vascular procedure.

Optimum Fit

Select the slot that provides the most conforming fit

Easy To Use

Strap ends close to prevent tangling

Inelastic Compression

Provides active, gradient compression for reduction of edema

Comprefit is pictured with the Compreboot.
Compreboot is sold separately

Adjustability

Garment straps may be trimmed as patient reduces in size. Strap Extenders may be used to gain 10cm of circumferential range

Coolflex Standard

CALF

20–40mmHg

Garment Features

- 20–40mmHg of lightweight, gradient compression
- Garment is made of Spacer Fabric TR™ and includes superior properties preventing the trapping of heat and promoting the transfer of moisture
- EZ Close Pressure™ system visually notes the compression levels of 20-30 and 30-40mmHg on the garment straps for the easy application of compression
- Hook closures for maximum strength and durability
- One-handed side closure system promoting independence and patient adherence

Indications

- Lymphedema
- Edema
- Chronic venous disease (CVD)
- Chronic venous insufficiency (CVI) including, but not limited to: ulcer due to venous stasis
- Lipedema

When to Use

- Patient requires a lightweight material due to skin sensitivities or fragility
- Varying ranges of adjustable resting compression is desired (20–40mmHg)
- Patient has limited hand strength or dexterity
- Ability to wear standard footwear over liner is desired
- Patient has difficulty leaning forward or bending, lateral or side closure to aid the patient in applying the garment is needed

Ideal for Patients Experiencing

- Recurring venous stasis ulcers
- Fragile or broken skin
- Skin sensitivities
- Poor hand strength
- Obesity
- Inability to don traditional compression stockings

Wrap Details

Variable Compression

Coolflex is a lightweight compression device optimal for individuals with fragile or broken skin. Its patented EZ-Close pressure system closes laterally which can promote independence and improve patient outcomes.

Most Breathable

The Spacer Fabric TR is designed to be highly breathable for cool-wearing comfort

One-Handed Donning

EZ-Close Pressure System of eight tabs makes one-handed, lateral donning simple, even for patients with dexterity issues

Innovative Design

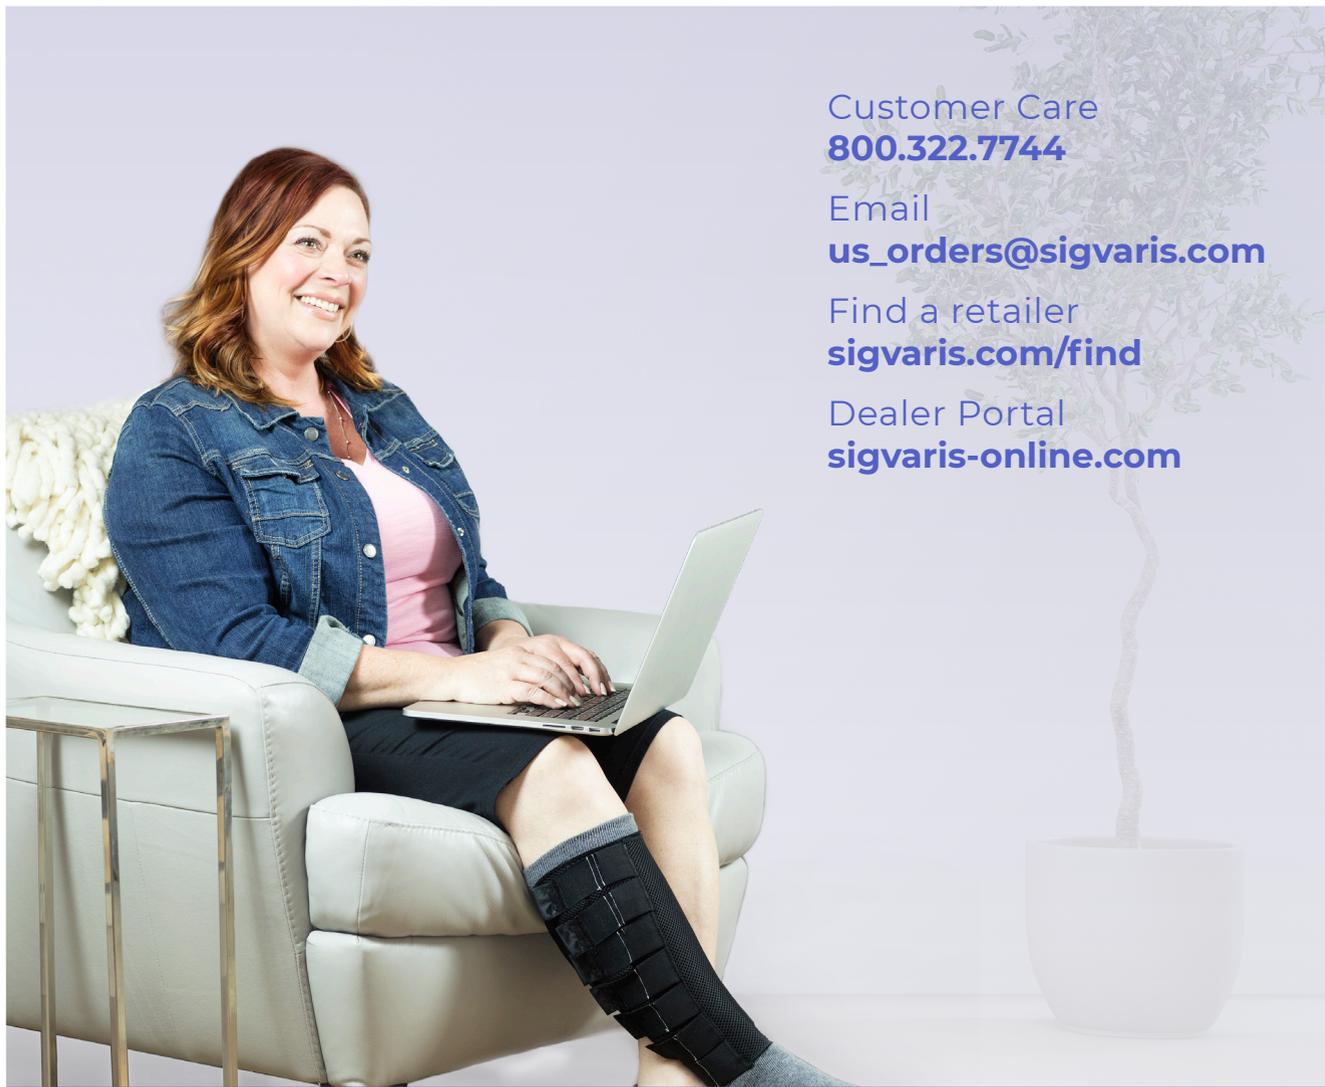

Durable, metal hook closures for maximum strength and durability

Accurate compression is easy with Coolflex Standard Calf

The integrated EZ-Close Pressure System provides a visual indicators for 20–30mmHg and 30–40mmHg on each tab.
