MEDICAL SOCKS AND HOSIERY

Sigvaris offers compression socks and hosiery in an assortment of fabrics and styles designed to fit your life. We offer sizes from petite to plus in two lengths to give you a great fit in all of our medical products.

SOLUTIONS FOR MEDICALLY COMPLEX EDEMA

For lymphedema and wound care management our wide range of solutions will support you day or night.

SIGVARIS WELL BEING

Want an easy way to get the energizing feeling of compression? Our Well Being socks and hosiery make shopping for 15-20mmHg compression simple with a sizing system based on your shoe size.

Live healthier with sigvaris

WHAT IS CHRONIC VENOUS INSUFFICIENCY (CVI)?

CVI occurs when the veins in your legs are not working effectively to return blood to the heart. Thankfully, our socks and hosiery are clinically proven to help provide relief.¹

Common Symptoms:

- Heavy, tired, or aching legs
- Initial signs of varicose veins
- A feeling of tension, cramps, or fatigue in your legs
- Swollen ankles or feet
- Spider veins or varicose veins
- Skin discoloration or problems
- Leg ulcer

Am I at Risk for Chronic Venous Insufficiency?

Risk factors include:

- Family history of CVI
- Age 40 or older
- Obesity
- Sitting or standing several hours a day
- Long distance travel
- Pregnancy
- Surgery or Trauma
- History of Deep Vein Thrombosis (DVT)

HOW MUCH COMPRESSION & WHY?

15–20mmHg is ideal for:

- Tired, achy legs
- Occupational or evening edema
- Leg discomfort from long hours of standing or sitting
- Prophylaxis of varicosities & swelling during pregnancy
- Prophylaxis for legs predisposed to risk
- Edema management during travel
- Prophylaxis of DVT during travel

18–25mmHg is ideal for:

- Diabetics who experience edema

20–30mmHg is ideal for:

- Heavy, fatigued, aching legs
- Mild edema in lower extremities
- Mild varicosities with minimal edema
- Mild varicosities during pregnancy
- Post-procedure of small veins
- Prevention or management of DVT

30–40mmHg is ideal for:

- Moderate varicosities with moderate edema (also during pregnancy)
- Post-procedure of larger veins CEAP C3, C4, C5, C6³
- DVT or Post-Thrombotic Syndrome
- Superficial phlebitis Lymphedema after decongestant therapy
- Orthostatic /postural hypotension
- Post-traumatic edema

Up to 50% of adults suffer from venous insufficiency²

STAY ACTIVE. PUSH YOURSELF.

Why have our products gained the attention of athletes and physicians? It's because compression has been proven to reduce swelling and reduce recovery times so they can get back on the game faster.

TRAVEL MUCH?

Business travelers & long haul drivers are at high risk for DVT because of the long hours they spend sitting still.

DEEP VEIN THROMBOSIS (DVT)

A DVT is a blood clot that usually forms in your leg or calf which blocks the flow of blood. Symptoms of a DVT include leg pain and tenderness with swelling and redness in the affected leg but, sometimes a DVT shows no signs at all. If left untreated, a blood clot can break loose and travel to your lungs. This instance is known as a Pulmonary Embolism (PE) and can be deadly.

900,000
PEOPLE ARE AFFECTED BY
DVT/PE EVERY YEAR

- Centers for
Disease Control
and Prevention

DIABETES

Compression socks (18–25mmHg) have been clinically proven to reduce swelling and help diabetic patients live a more active lifestyle.⁵

SIGVARIS GROUP NOW OFFERS SOLUTIONS FOR LYMPHEDEMA MANAGEMENT

It is estimated that 10 million people suffer from Lymphedema in the U.S. every year.⁶ Lymphedema is a disease in which the lymph fluid does not drain properly. Most often it affects an arm or leg, but it can also affect other parts of the body such as the head and neck. Untreated venous insufficiency can progress into a combined venous/lymphatic disorder.

Risk Factors for Lymphedema Include:⁷

- Morbid obesity
- Surgery or trauma
- Lymph node removal
- Radiotherapy
- Family history
- Recurrent Cellulitis
- Post-Thrombotic Syndrome

WORK SMARTER, NOT HARDER

Did you know one out of five working men and women have leg problems? This results in more than two million lost work days every year. A simple change of socks can help workers avoid leg pain and become more productive in the workplace.⁴

Essential

Socks & Hosiery

Get back
to basics

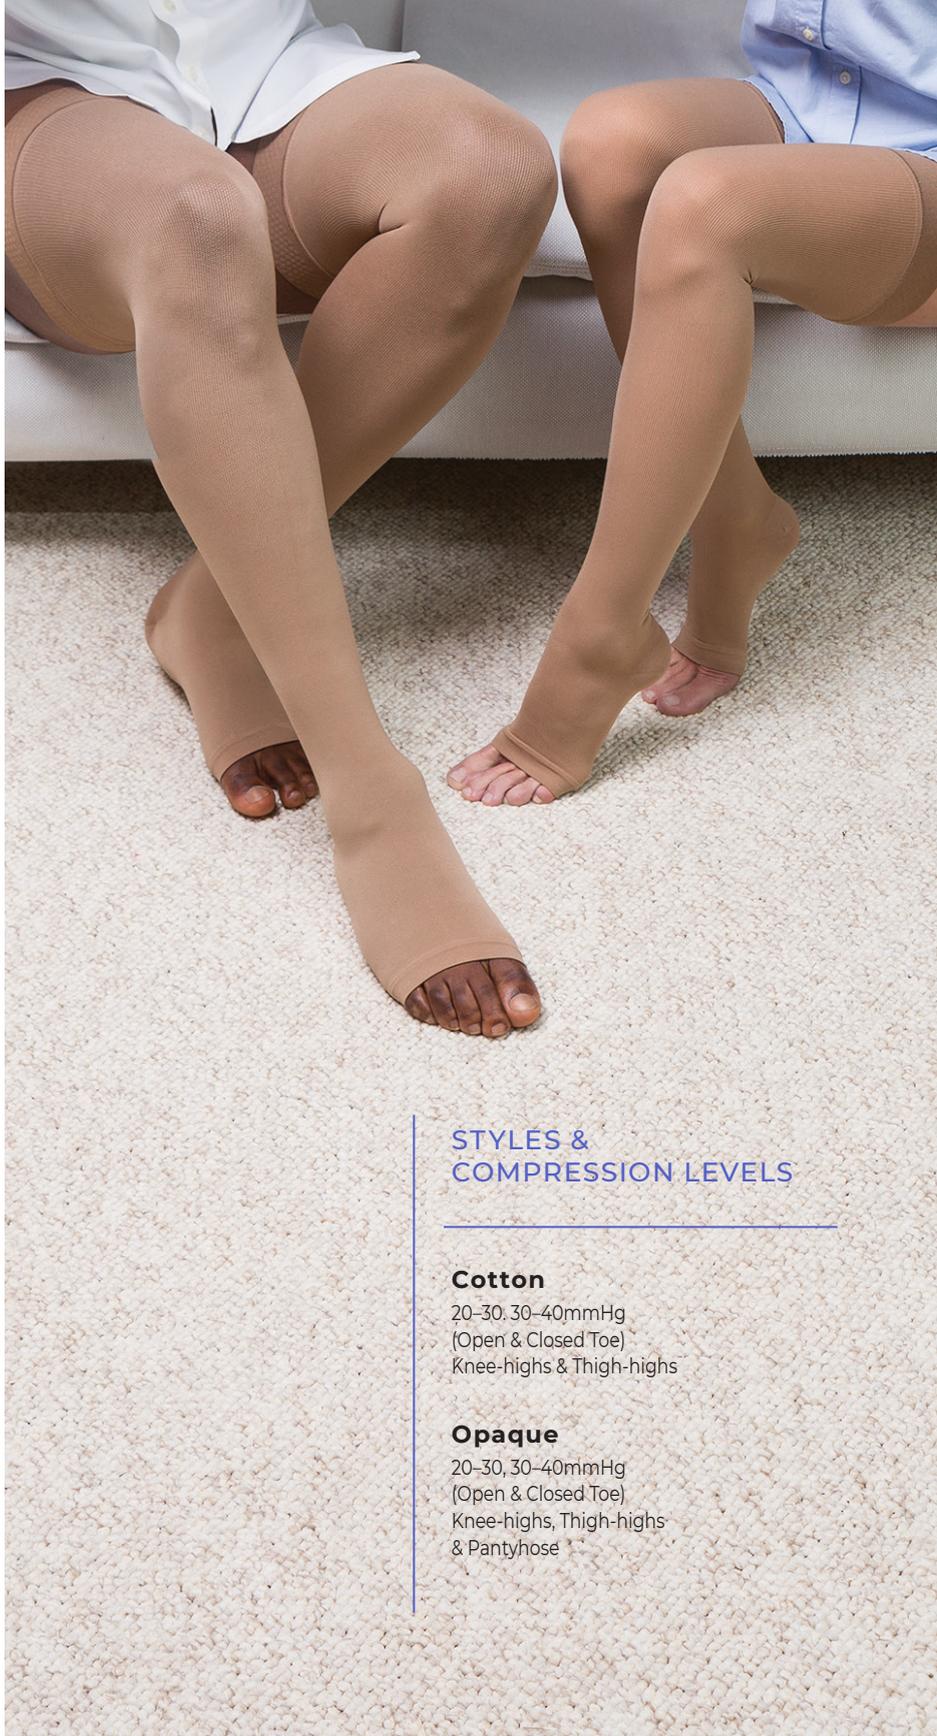

sigvaris

The design and style of the essential line combines support and reliability into comfortable, everyday stockings. This line is perfect if you travel long distance for work or if you just need a consistently comfortable sock. This garment will be your new go-to if you're looking for traditional therapeutic hosiery.

Solutions for medically complex edemas

Compreflex[®] Reduce

INTELLIGENT DESIGN

Compreflex Reduce is a simple and effective system used during early decongestive phase of lymphedema therapy.

Replacing the need for traditional bandage wrapping, each Compreflex Reduce garment can be repeatedly cut to fit and easily assembled. The ability to customize the garment is ideal, as patients in decongestive therapy experience consistent changes in limb size.

Compreflex Reduce

CUSTOM GARMENTS

When a personalized solution is needed, SIGVARIS GROUP is standing by with customized solutions. We offer custom-sized stockings in **Natural Rubber**, **Cotton** and **Opaque** lines as well as compression garments for the treatment of chronic edemas and lymphedema in the upper and lower extremities.

Compreflex®

ACCURATE COMPRESSION WITH AN EASY FIT

20–50mmHg

The Compreflex line includes various upper and lower extremity compression garments and is perfect for patients with:

- Edema of various etiologies
- Obesity, fragile skin, and limited mobility or grip strength
- Donning challenges and compliance issues
- Venous ulcers
- Lymphedema

Coolflex™ Standard Calf

LIGHTWEIGHT AND BREATHABLE

For management of chronic venous disease, active venous ulcers and edema of different comorbidities.

Coolflex Standard Calf is a lightweight, breathable, easy-to-don and comfortable inelastic compression garment. The patented EZ-Close Pressure System™ allows patients to don their garments independently while applying the accurate dose of therapeutic compression.

20–40mmHg

Day and night compression garments

A full line of comfortable inelastic medical compression garments for day and night wear; washable and designed to provide therapeutic results.
