Swell Spots™

MANUFACTURED BY SOLARIS

Swell Spots are professionally designed treatment pads that tuck into garments or under bandages. Use them any time, day or night, to address particularly troublesome areas of edema, fill concavities, or diffuse pressure points. They can also be customized to provide a unique solution*.

Highlights

Proprietary fabric is comfortable, breathable, wickable, and thermal release.

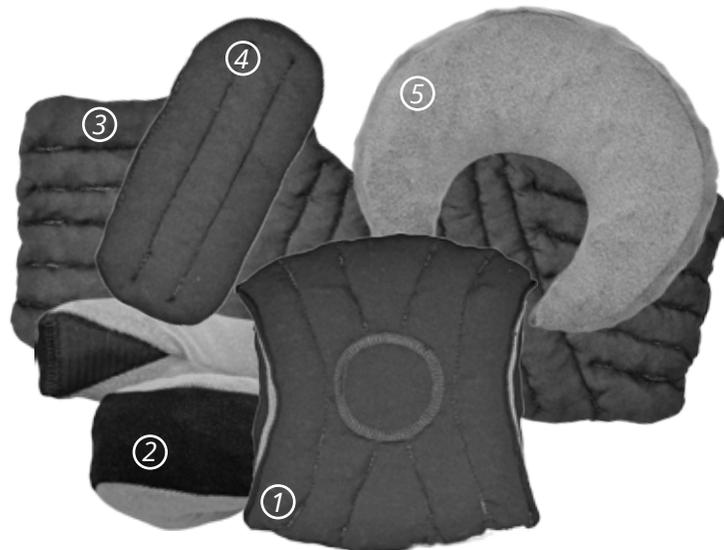

Grey microfiber fabric grips skin and encourages gentle tissue stretch to help open the initial lymphatics and encourage reabsorption.

Help break up tough fibrotic tissue while protecting delicate skin.

Evenly disperse irregular pressures to prevent compression hot-spots.
