

FLEXITOUCH® PLUS

ADVANCED PNEUMATIC
COMPRESSION SYSTEM

Take Your Lymphedema Treatment Home

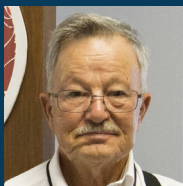

BUFFY, RICK AND EMMA—ACTUAL FLEXITOUCH USERS

MEET JANIE
FLEXITOUCH USER

As a successful businesswoman, being diagnosed with breast cancer and then lymphedema could have dramatically altered Janie's lifestyle. But instead, Janie found the right therapy, including the Flexitouch system. She says, "When I go home at night I wrap myself in this garment while I'm watching TV. It actually helps calm me. It's a fantastic treatment."

MEET MELVIN
FLEXITOUCH USER

Neither Melvin nor his physicians were certain why his legs were swelling beyond his control. But once the term "lymphedema" was offered as a possibility, Melvin took control and is now successfully managing his lymphedema using the Flexitouch system. Since then, he has become an advocate for lymphedema research and we applaud his efforts and cheer him on.

FLEXITOUCH PLUS

PROVEN PERFORMANCE PLUS COMFORT AND CONVENIENCE

If you're experiencing chronic swelling, pain, limited mobility and/or skin hardening it might be due to lymphedema.

The Flexitouch system is used by tens of thousands of patients to manage their lymphedema at home. The Flexitouch Plus garment works by sequentially inflating and deflating its chambers to create a gentle wave-like motion that directs lymph fluid from the impaired area toward healthy regions of the body. The fluid is then naturally absorbed and processed by the body.

If left untreated, lymphedema can lead to serious bacterial skin infections called cellulitis. Studies have shown that the Flexitouch system is the only pneumatic compression device proven to stimulate the lymphatic system,¹ enhance quality of life,² and reduce episodes of cellulitis.³

KEY FEATURES OF FLEXITOUCH PLUS

COMFORT: garments made of soft, comfortable fabric

CONVENIENCE: garments designed for ease of use including a bilateral lower extremity option

COMPLIANCE: high patient satisfaction encourages ongoing usage

UPPER EXTREMITY

LOWER EXTREMITY

HEAD AND NECK

IMPROVED QUALITY OF LIFE

96% Patient satisfaction with the Flexitouch system treatment²

88% of patients experienced limb volume reduction²

85% of patients improved their ability to perform activities of daily living²

79% Reduction in the rate of episodes of cellulitis³

37% Reduction in total lymphedema-related costs per patient³
