DEAR DOCTORS, FRIENDS & COLLEAGUES,

our first virtual Lymphology Summit 360 has drawn the attention to more than 2.500 specialists and participants from around the world last year. We have been overwhelmed by the interest in **lymph- and lipedema as well as vascular exchange** on a scientific level and **in a unique combination with patient and business perspectives**.

One year later the need for continuous education continues, specifically in the interfaces between indications, patients and therapy options. New concepts for lipedema treatment come up, rare indications are investigated further and patients themselves are considered as the decisive factor for successful outcomes.

Many aspects that call for a holistic approach in education. For this reason, we are pleased to invite you to the **2nd Lymphology 360 Summit, a virtual symposium** and holistic event with renowned speakers from different specialties bringing all aspects & stakeholders for successful therapy outcomes together.

We look forward, meeting you during our scientific event on **May 19th and 20th**.

Yours organization team of **#LYMPHOLOGY360**,

EGGEN**
